

Power Cables

20 - 200 Amps

If you are in need of cables for any of your power needs, Robert Technologies, Inc. manufactures a rugged commercial line of power connectors built to exceed Mil C 22992 Class L requirements and can also fulfill your cabling needs as well. Using our vast inventory of connectors, tooling and accessories and an in-depth knowledge of connectors that one can only gain with experience, we offer you an alternative to broken delivery promises, quality control issues or excessive pricing concerns.

Robert Technologies, Inc's connectors are compatible to the MS9055* Series of military specification connectors found on all types of power generation and distribution systems as well as ECU's, Radar systems, Communications stations and many other mobilized equipment uses.

We can build your cables from materials kept in stock to avoid lengthy lead times so you have the cables you need, when you need them. Just let us know the length, cable type and connectors needed and we will have a quote to you within 24 hours, and usually within 30 minutes.
